

## DATA SECURITY

### The AuthentiConnect Solution

Security and safety of a client's information is a primary concern of ours. To ensure maximum security of client data, we have developed a unique proprietary system called AuthentiConnect, which employs sophisticated industry standard encryption technologies coupled with our own secure authentication system to enable safe access to your data over the Internet. With Analytix's data security infrastructure, all accounting and bookkeeping client data is completely secure.

### IT Security Measures

Analytix uses SAS 70 Type II Certified data centers that comply with the highest security measures for data and application integrity. SAS 70 Type II-Certification is an internationally recognized auditing standard of the American Institute of Certified Public Accounts and is an assurance that Analytix abides by stringent controls and safeguards. With n+1 redundancy in all systems, Analytix's Data Centers provide the most robust Service Level Agreements (SLAs) in the industry.

- ▶ **Encryption**
- ▶ **Authorized Access**
- ▶ **MA CMR 17.00 Compliant**
- ▶ **Machine Specific Access**
- ▶ **Data Center**

Analytix, in association with its third party data center affiliate, offers the following robust security measures to ensure security for its clients:

- Physical Security
- Systems implementation authorization, testing, verification and documentation
- Systems Enhancements and Maintenance
- Problem Management
- Frequent System Backup
- Environmental Controls

### Benefits

Meets and exceeds Internationally Recognized Auditing Standard

Remote access to your data — anytime

Protection of data loss with continuous backup

SAS 70 Type II certified data center

Digital images of financial documents can be requested anytime

Customizing secure access to various users based on roles

Physical security controls

Logical security controls

**//** Analytix emphasizes integrity of the data, the network, and their business practices. I am very confident in the abilities and customer service of the Analytix team. **//**

Jason Veducchio, Principal  
VEDUCCIO + PARTNER

### About Analytix Solutions

Businesses who are positioned for growth turn to Analytix Solutions for scalable, single source, business solutions. We provide small to mid-sized businesses with a full range of accounting services, ranging from bookkeeping to CFO services, in addition to accounting systems automation and integration.

### ▶ **Cloud Security Compatibility**

Our specific security technologies and services include:

- Network Intrusion Detection & Prevention
- Log Aggregation and Correlation
- Two-Factor Authentication
- Automated Vulnerability Scans
- Anti-Virus Systems
- Third Party Penetration Testing
- Physical Security (Restricted Access)
- File Integrity Services

## Financial Controls

- ▶ **Check Processing:** Enables only authorized personnel to login and print the checks locally.
- ▶ **No Bank Account Access Required**
- ▶ **No Physical Records, Just Electronic Records**
- ▶ **Access Control to Data by User**
- ▶ **Audit Trail**

Call us today for a **FREE** analysis of your accounting system!

“Not only does Analytix manage our back office financials, they assist us with our electronic document storage providing us with online access to all of our vendor contracts. We really take advantage of their web portal, especially for the e-documents. They are responsive, extremely efficient and pay close attention to details. They are really helping us to become more proactive than reactive in our financial management. We have been able to reduce costs associated with financials and record keeping by approximately 60% since we began using them.”

Richard D'Angelo, Owner  
RED PARROTT

**Disclaimer:** Analytix hires third party data center facilities to deliver robust security for our clients. We initiate regular security checks and measures to ensure this. Analytix Solutions cannot be held directly accountable for any breach at the third party data center.
