

COMPUTER-AIDED DESIGNING AND DRAFTING

Audio-Visual CADD Solutions by Analytix

When you outsource to Analytix, you partner with an experienced team that specializes in the design and installation of sophisticated Audio-Visual (AV) systems. We can convert conceptual 'napkin' design drawings into detailed schematic plans including comprehensive system interconnection and signal flow for use by any professional installation crew.

Analytix is proud to support clients with robust web-based technologies and highly sophisticated job management tools. Clients are able to conveniently submit, monitor and modify AV designs. Once submitted, our highly trained CADD designers complete work efficiently and ensure you stay on-time and on-budget. We can help to complement existing operations and increase profitability. Our CADD services include:

- ▶ **Conceptual Design Drawings:** Basic line drawings to denote signal flow and general concepts. An outstanding pre-sales tool when finalizing your solution with end-users
- ▶ **Schematic Drawings:** Basic to advanced line drawings which accurately describe detailed system interconnection and signal flow
- ▶ **As-Built Documentation:** Complete documentation for installed systems or facilities combining all changes and updates
- ▶ **Cable and Conduit Riser Diagrams:** AV cables origination and destinations drawings imposed over architectural CADD documents
- ▶ **Equipment and Custom Plate Detail Drawings:** Sophisticated drawings, diagrams, schedules and other data to meet customer needs
- ▶ **Construction Drawings and Documents:** Detailed drawings and documentation, including technical information such as dimensions, schedules and referenced large-scale details
- ▶ **Rack Elevation:** Drawings portraying the placement of AV and related equipment within an enclosure

Call us today for a FREE trial of our CADD services.*

*Trial project not to exceed 12 hours

Benefits

Save up to 40 percent on project cost

Free staff from mundane tasks

Work with skilled and specialized CADD engineers

Avoid recruiting, hiring and training hassles

Submit and monitor project status around-the-clock

Electronically store, back-up and archive important project data

“We have been able to perform, initiate and complete additional projects with fewer employees and without any added costs. We truly have a mutually beneficial long-term partnership.”

Jason Huss, Vice President
JIFFY LUBE OF INDIANA

About Analytix Solutions

Businesses who are positioned for growth turn to Analytix Solutions for scalable, single source, business solutions. We provide small to mid-sized businesses with a full range of accounting services, ranging from bookkeeping to CFO services, in addition to accounting systems automation and integration.
