ANALYTIX SOLUTIONS

Optimal Business Productivity

Maximize efficiency through automation and integration

At Analytix Solutions, we can help you to plan, implement and upgrade your existing accounting system to ensure optimal business productivity. We recognize that every business runs differently. We work with you to determine where you can gain efficiencies in your accounting systems by integrating other applications into your accounting processes. We can help you to run your business more efficiently by automating key processes and assisting you to select solutions which align with your unique business requirements.

Analytix provides a team of accounting and technology experts with extensive experience in integrating third party applications with various accounting systems. Our technology experts can manage all phases of systems implementations and integrations with applications such as QuickBooks, Great Plains, Peachtree, Intacct, etc. We can even provide post implementation training sessions and help desk support, depending upon your company's needs.

Contact us today for a FREE analysis of your accounting system, and learn why we are the company that CPA's recommend!

Benefits

Eliminate redundancies in manual data entry.

Reduce risks of errors and duplicate entries.

Ensure data integrity through automation.

Timely financial reports.

Improved productivity.

"*One of Analytix Solutions' greatest strengths is that they look at every single process, and they automate it as much as possible. This greatly reduces the risk of inaccuracies, and it makes us more efficient as a business. Other companies we tried using just threw more manpower at a situation, which ultimately increased our costs. Analytix Solutions is now our entire accounting department, and they have added great economic value to our businesses.*"

Don Crowe, *CPA, CEO*
ARENA SPORTS

ANALYTIX SOLUTIONS

Processes we have successfully automated:

- Importing 1000 vendor invoices per month in accounting system

- Recording insurance billing, commission and payable in a single step — 1000s of transactions per month

- Importing daily receipts and sales to accounting system for more than 50 stores

- Integrating ADP payroll with accounting system — by department

- Importing e-commerce transactions with product details

- Generating dashboard and business intelligence reports by integrating with three different databases
